

Who makes Natron batteries?

Build America. Buy America. With products sourced from minerals readily available in the U.S. and manufactured in Michigan, Natron Energy is a U.S. company that meets BABA requirements. The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes.

Are Natron batteries sustainable?

Unlike lithium-ion batteries that rely on conflict materials, Natron Energy's sodium-ion batteries are built using only abundantly available elements and offer unmatched sustainability. How Sustainable?

Is Natron Energy a good battery company?

With the commercial-scale production up and running, Natron Energy is poised to lead the way in Sodium-ion Battery technology. The company's focus on high performance and safety ensures that sodium-ion batteries are well-suited for a range of applications. This includes everything from data centers to electric vehicle fast charging, and more.

What makes Natron Energy batteries different?

Natron Energy batteries and systems outperform lithium-ion and lead acid batteries in power density, recharging speed, and expected lifecycle thanks to our unique sodium-ion battery technology. Turning Chemistry into Currents.

What is Natron Energy?

At Natron Energy, we're changing the way the world looks at critical power and industrial batteries for high-powered applications like AI, data centers, peak shaving, and power quality management. Natron sodium-ion solutions outperform, are significantly safer, and are far more sustainable than lithium-ion options.

Who is Natron Energy?

Are natron sodium-ion batteries safe?

Unmatched Safety. Natron sodium-ion batteries cannot be induced to thermal runaway, don't leak dangerous chemicals, and don't need a containment system to be certified as inflammable. Read how our sodium-ion battery technology is safer while delivering more power faster & longer than other options.

HOLLAND, Mich. -- One company is bringing its sodium-ion battery industry to West Michigan. Natron Energy, founded in 2012 by Colin Wessells, celebrated the grand opening of its first at-scale ...

A Big Blue Breakthrough. Like traditional lithium-ion and lead acid batteries, Natron battery cells have a positive electrode (cathode), a negative electrode (anode), a porous separator between the two electrodes, along with a paste-like, non-aqueous electrolyte that enables charge (ions) to pass back and forth between the electrodes.

After countless hours of development with an ever-growing team of scientists and engineers, Natron expanded, creating a state-of-the-art pilot production line for sodium-ion batteries in Santa Clara, California. An Industry First. In 2020, ...

Product information for Natron Energy. Consent. This site uses third party services that need your consent. More information. Accept ... Unlike other sodium-ion battery options, Natron Energy's unique sodium-ion cell uses Prussian blue electrodes to create a safer, more powerful battery that operates at an extremely wide temperature range. ...

The increase of Artificial Intelligence (AI) loads has changed the landscape of data center critical power requirements and high power, high cycle battery solutions are now more important than ever. No other battery is as suited to this critical need as Natron's BluePack(TM). Able to provide 100% of its rated power over a two-minute discharge ...

Natron's Holland facility began production of the company's sodium-ion batteries this week. // Photo courtesy of Natron. California-based Natron Energy Inc., a global developer of sodium-ion battery technology, began commercial-scale operations on April 29 at its manufacturing facility in Holland, west of Grand Rapids.

Natron Energy fell a little behind schedule on production plans for its sodium batteries but officially commenced production of the rapid-charging, long-life lithium-free batteries this week...

Natron Energy is investing \$1.4 billion to establish a Sodium-ion Battery factory in North Carolina. The investment will create more than 1,000 jobs in Edgecombe County. Sodium-ion Battery Factory in N.C. Natron Energy, America's sole Sodium-ion Battery manufacturer, announced its plans on August 15. The new plant will be built at the Kingsboro ...

Natron Energy, a pioneer in Sodium-ion Battery technology, has officially commenced commercial-scale operations at its state-of-the-art facility in Holland, Michigan. Sodium-ion batteries offer several advantages over ...

local supply chains are essential to meeting global demand and addressing the challenges ahead. Natron Energy's advanced sodium-ion battery technology is one of these solutions. This white paper explains the chemistry behind Natron's Prussian blue ...

The sodium-ion cells in Natron's unique battery chemistry are based on Prussian blue electrodes, which means they're non-flammable, highly efficient and deliver significantly more life cycles than lead-acid or lithium-ion options. The BlueTray(TM) 4000 features: Safety and Sustainability --constructed using safe, commodity materials

Natron Energy. Natron Energy is making a significant impact in the energy storage industry by investing \$1.4

billion in a new Sodium-ion Battery plant located in Edgecombe County, North Carolina. This investment is crucial for the advancement of sustainable energy solutions and marks a substantial increase in the company's production capacity.

That is why it has given its production capacity as MW power figure and not the MWh capacity that battery manufacturers typically do, as it is primarily targeting power-intensive applications, a spokesperson said. The Michigan facility was originally a lithium-ion factory belonging to technology firm Clarion but Natron Energy has refitted the site to manufacture its ...

A key official of battery manufacturer Natron Energy made clear that work is going to start next year on building a nearly \$1.4 billion plant at the Kingsboro Business Park off U.S. 64 in ...

Read how Natron's sodium-ion batteries offer the assurance of uninterrupted power supply for EV battery chargers. ... Designed for 48V to 480V critical power applications, the BluePack(TM) Critical Power Battery offers unparalleled safety ...

3 ???· Natron Energy Announces Appointment of Wendell Brooks as Chief Executive Officer. SANTA CLARA, Calif.-(BUSINESS WIRE)-Natron Energy, Inc. ("Natron" or "the Company"), a global leader in sodium-ion battery technology, today announced the appointment of Wendell Brooks as Chief Executive Officer. This appointment follows a transitional period during which ...
