Project PULSE is part of Neste's activities to advance chemical recycling. Chemical recycling turns waste plastics into hydrocarbons that can be used as a raw material for the production of new plastics and chemicals, complementing existing recycling technologies, e.g. mechanical recycling. It helps to close the loop within a circular economy.

Our goal at Advanced Power Systems is to evaluate the needs of each customer and tailor a solution which provides the most productivity and the lowest cost of ownership. In today's business environment it is very important to provide solutions to customers that give them the ability to meet the demands of a changing market. We achieve this by ...
