Students and faculty in Hawaii Public Schools are back in session in a more comfortable environment. More

than 300 Powerwalls are paired with solar to power the air conditioners in classrooms across the state. The end result is improved student performance, reduced energy costs, and environmental stewardship.

Powerwall can be integrated with a new or existing solar system. Adding Powerwall to your solar is the best way to maximise your system's value, allowing you to use solar power day and night. To ensure reliable operation during power outages, at least one Powerwall is required for each 5 kW AC of solar included in the backup circuit.
