

What is an automated vertical storage system?

An automated vertical storage system is a contained access system that takes advantage of typically unused vertical storage space in a warehouse. They are the solution for many challenges found in warehouses and shop floors across the world today. These warehouse storage systems are offered at Vertical Storage USA:

How does a vertical storage system work?

An automated vertical storage system can help employees quickly locate parts or products without the need to walk endlessly up and down aisles. After inputting the product name, order number, or parts list into the control pad or computer interface, the requested materials are delivered to the vertical lift module's access point.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.
