What is a Microgrid? A microgrid is a localized energy system capable of operating independently or in parallel with the main power grid. It is comprised of distributed energy resources, such as renewable energy generation, battery storage, and traditional reciprocating engine resources. The key feature of a microgrid is its ability to "island" for 24+ ...

PowerSecure is able to deliver on this promise because our expert engineers design all of our hybrid renewable energy systems and microgrids using modular technology. This allows us to build microgrid solutions that can easily scale to meet any energy requirements you have -- whether to power a hospital that delivers life-saving care or to ...
