There are three main types Of solar power systems: On-grid - also known as a grid-tied or grid-feed solar system; Off-grid - also known as a stand-alone power system (SAPS); Hybrid - solar plus battery storage with grid-connection. On-grid renewable energy systems. On-grid is a solar system that is connected to the utility power grid.

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, hybrid ...
