

Is Portugal phasing out gas-powered electricity?

Following the closure of its last coal plants in 2022, Portugal is now working towards completely phasing out gas-powered electricity, which currently constitutes 21% of its consumption, by 2040. Central to Portugal's energy strategy is the diversification of renewable resources, combining wind, water, and solar power.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

Is Portugal's energy grid sustainable?

An enthusiastic cyclist, she is also an ardent advocate of eco-friendly transport. Portugal recently sustained its power grid on 100% renewable energy for six consecutive days, setting a new record and exemplifying a significant shift towards sustainable energy sources.

What is Portugal's Energy Strategy?

Central to Portugal's energy strategy is the diversification of renewable resources, combining wind, water, and solar power. This approach not only ensures a stable energy supply but also significantly reduces costs.

Can Portugal run entirely on renewables?

But the last time Portugal had ideal conditions for a renewables record, it only lasted one-third as long without burning gas. As more wind and solar capacity comes online, Portugal expands its arsenal for running entirely on renewables. This particular week stood out, but it exemplifies a historic shift in energy sources.

Is Portugal a good renewable leader?

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent). But, as elsewhere, it's no good a renewable leader resting on its laurels.

Portugal's success in operating on 100% renewable energy for six consecutive days is not just a record-breaking event; it represents a pivotal step in the global shift towards sustainable energy. This achievement ...
