The "Sell" is Sell from Battery. "Charge" is charge from grid. Battery first feeds battery before loads from solar (house might be powered from grid while battery charges) Here's my settings to charge when possible. I have % set to 40 (expecting bad weather, live in Texas, who knows if power will remain) normally have it set to 20%

For what it's worth, I have been able to get all battery specs for each battery through SolarAssistant by linking and addressing the Jakipers through the 485 ports, then using the rs232 serial port on the master battery to the USB adapter on the Raspberry running SA. I don't know how well known this method is but I sort of stumbled onto it.
