

We provide turnkey solutions up to hundreds of MW's that integrate a Saft lithium-ion battery system with power-conversion devices as well as power control and energy-management functions. Saft's lithium-ion energy storage systems batteries are used for: Large renewable integration (PV and wind farm) installations

Reduced operating costs throughout the battery's long life; Single cell design offers a high level of flexibility in configuring the battery system; ... Saft Groupe SAS as data controller will process your data for the purposes of providing the services and for its legitimate interest. Any mandatory fields are marked with an asterisk.

Features & Benefits. Saft Urja - ReGenPro nickel battery - Ultra-Low maintenance . ReGenPro is Saft India's latest development in Ni-Cd battery technology combines Ultra-Low maintenance operation with total reliability to provide the ideal backup power solution for industrial installations.. Together with other key features such as its optimized gas recombination efficiency, flame ...

Saft's new Intensium-Shift battery storage system: 30% more energy, lower footprint, maximizing renewable integration . 30/08/2022. Saft powers the transition of small Italian islands to renewable energy . 11/05/2022. Saft energy storage system will smooth grid integration for Côte d'Ivoire's first solar plant .

You can also ask for restriction of the data, portability of the data and/or make a claim to the CNIL (the French data protection agency). For any request please send it to GDPR@saft or to the following address: Saft Groupe SAS Communications Department 26, quai Charles Pasqua 92300 Levallois-Perret - France Find out more

Saft's on-board solutions provide reliable power, reduced weight and volume of on-board components, low maintenance and improved battery efficiency to help train manufacturers and operators work more efficiently. ... A single MSX battery can perform both backup and engine starting functions so that two onboard systems can be replaced by just ...

Arrok Low Voltage battery. Arrok is a scalable battery solution developed by Saft for the unique requirements of industrial vehicles. It is based on Saft cells using lithium nickel manganese cobalt oxide (NMC) chemistry. The cells are integrated into ...

High-performance battery with very low self-discharge, application: long periods under constant strain, mercury- and cadmium-free, weight: 51.0g, diameter: 26.0 mm, height: 50 mm, Voltage: ...

Powerful lithium-ion batteries for immediate backup . Saft cutting-edge li-ion battery solutions deliver an immediate independent power source in the event of an outage to ensure the continuity of the UPS protecting

high-value, mission-critical data. Our range of advanced and powerful lithium-ion batteries can instantly crank up an emergency generator engine, offer high ...

The right Ni-Cd and Lithium battery choice for the oil & gas industry. For decades, Saft's global network has been supplying long-life primary lithium batteries, rechargeable lithium and nickel batteries that can operate in extreme ...

Saft provides backup Ni-Cd battery solutions for telecom equipment and network. Saft nickel batteries for telecom equipment suppliers and network operators ensure total continuity of customer service. Wireless or wireline installations, indoor or outdoor, on-grid or off-grid, Saft's portfolio of advanced, specialized battery solutions meet telecom energy needs in very hot or ...

Features & Benefits. Saft Urja KPL, KPM, KPH nickel batteries offer a wide range of low, medium and high discharge rates and capacities. They boast a flexible solution for all types of industrial applications. KPL, KPM, KPH vented pocket plate nickel batteries are IEC 60623 and IS 10918 certified and available in translucent polypropylene cases.. Technical Specifications

Military forces around the world have entrusted their battery needs to Saft. Our in-house R& D results in continuous innovation - advancing technology and improving design and performance to ensure our complex batteries can call on the most advanced and efficient electronics and software for power, safety and communicating battery data to the ...

We provide turnkey solutions up to hundreds of MW's that integrate a Saft lithium-ion battery system with power-conversion devices as well as power control and energy-management functions. Saft's lithium-ion energy storage systems ...

250/500 kW Battery System. For directed energy and other applications requiring very high pulse power, Saft offers a scalable and compact 250-500 kW battery system. The 250 kW system is a building block for larger, higher power 500 kW, 750 kW ...

Saft can help by enhancing battery durability to conform with the new regulations while maximizing performance in a similar or smaller package. Saft is focused on technology advancements and a mindset of continuous, annual improvement instead of long-term, multi-year projects. This mindset enables Saft to design the best race car batteries.
