How much does a home battery cost without solar panels?

The cost of a home battery without solar panels can change a lot. It depends on things like what type it is, how much power it holds, the brand, and how it's set up. Usually, it can cost from £2,000 to £10,000 or more. Think about how much money you'll save on power bills later and if there are deals or help with money when you get a home battery.

Should you invest in a solar panel system without storage?

If you're a homeowner who uses the majority of your energy during the day, then it might make greater financial sense to invest in a solar panel system without battery storage, given the current 0% VAT, considering that a solar panel system is warranted for 25 years and a battery-only system just for 10.

Should you use a home battery without a solar panel?

Home batteries, even without solar panels, are super helpful. They keep your power on when there's a blackout, making sure important stuff like your gadgets keeps working (*if the battery has island mode functionality.) Plus, they save electricity when it's cheaper, so you use less when it costs more. That means smaller energy bills.
