Salix Energy has been successfully operating on the Ukrainian agro-energy market for over 10 years. The company's focus was mostly directed to biomass production. However as the world is moving towards a more sustainable, innovative future, Salix Energy has decided to expand its focus and introduce to the market new more environmentally ...

Green energy came in handy. One of the pioneers in the introduction of green energy, was the company "SALIX ENERGY", which since 2010 has been growing vines for the production of wood chips as a source of heat and electricity. In 2014, Salix Energy, in cooperation with Avanti-Development, built three

biofuel boilers in the village of Ivanychi.

Phase 3 of the Public Sector Decarbonisation Scheme, worth £1.425bn, was launched by Salix on behalf of the Department for Energy Security and Net Zero in 2021. The Public Sector Decarbonisation Scheme provides grants for public sector bodies to fund heat decarbonisation and energy efficiency measures.
