

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Will Indonesia & Timor-Leste be able to install solar panels?

Jakarta, 4 Nov. 2022 -- At least 80 technicians from Indonesia and Timor-Leste have completed training on Solar PV technology, by the United Nations Development Programme (UNDP) with support from the Korea International Cooperation Agency (KOICA) paving the way for more installation of solar panels in the remote parts of the countries.

Will Timor-Leste replace oil imports with solar power?

More than 75% of oil imports in Timor-Leste are used for electricity production across the country and around 90% of the sector's operating costs are fuel costs associated with power generation. The Government of Timor-Leste intends to replace part of this high-cost generation by more cost-efficient solar power.

Why is Timor-Leste not able to finance solar panels?

MDF research found that lenders in Timor-Leste are unwilling to lend to small and medium sized enterprises due to levels of default, perceived risks, and the difficulty of securing collateral. Evaluate the upfront costs of installing solar panels versus long-term savings. Consider financing options to determine overall economic viability.

How many power plants are there in Timor-Leste?

The generation capacity in Timor-Leste currently stands at almost 300 MW consisting of 3 power plants. In addition to these main power plants meeting most of the power demand of the country, small diesel-fired generators serve as a significant source of electric power in many localities with inadequate power from the grid.

The Timor-Leste government maintains a Transparency Portal which gives oversight over budget expenditures as well as up-to-date information on the extractive sector including the legal framework, licensing, contracts, production, social expenditures and non-tax revenues.; EITI reporting has been used to disclose the status of the Petroleum Fund and how ...

Timor Leste is one of the newest countries in the world, having gained independence in 2002 after centuries of occupation and exploitation by various foreign powers. For the past 20 years, Timor Leste has been struggling to find its way into the world economy with its leaders debating whether it should:
