

What is the energy mix in Senegal?

In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind. Current percentages of power generation:

How does Senegal support regional energy cooperation?

Senegal supports regional energy cooperation as a member of the West African Power Pool (WAPP) and is a member of regional organizations to develop hydroelectricity resources on the Senegal (OMVS - Senegal River Basin Development Organization) and Gambia (OMVG - Gambia River Basin Development Organization) rivers.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.

Can Senegal achieve universal access to modern energy?

In order to achieve universal access to modern energy, to spur industrialisation and consolidate a low-carbon, resilient and sustainable energy system, Senegal has recently joined the ranks of countries (South Africa, Indonesia, Viet Nam) having entered a Just Energy Transition Partnership (JETP).

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

How is Senegal reorienting its energy sector?

Senegal is taking such an approach by reorienting its energy sector away from a reliance on imported heavy fuel oil (HFO) towards wind and solar energy as well as domestic sources of offshore liquefied natural gas (LNG), with the intent to make energy more affordable, more widely available, and cleaner.
