

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the construction of wind power plants has almost completely halted, with two small wind parks existing in Cerov and Myjava.

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

How much electricity does Slovensk&#233; elektr&#225;rne produce?

As reported by Slovensk&#233; elektr&#225;rne, the power plant has already generated over 150 GWh of electricity and is currently producing enough to meet the needs of approximately 750,000 households. The culmination of this testing phase will be running the unit continuously at 100% output for 144 hours.

3 ???&#0183; Slovakia's main gas buyer SPP and groups from Hungary, Austria and Italy warned the European Commission on Tuesday of the risks of an end to natural gas transit via Ukraine, as ...

Here KEDS has installed 5 new transformers, over 400 concrete pillars and thousands of meters of electrical cables. The cost of this entire project is estimated at over 400,000 euros. Residents and businesses of these parts will no longer have problems from winds and other atmospheric factors, which previously caused problems. The new project provides ...

As part of the network digitalization, KEDS built the Kosovanet platform to monitor any movement in the electricity network. The platform contributes to the flow of work by becoming an integral part of the operation of field teams and at the organizational level. Kosovanet brought more accuracy, speed and efficiency in detecting each occurrence in the ...

A country's energy system is not an easy system to understand and manage. The complex nature of the
