

In my opinion, solar power in Saint Lucia remains in the hands of those who can make a large investment in the long term. For those who at some points cannot even afford the cost of electricity services, investing a large sum into solar panels is not a possibility, even though in the long term it will be consistently cheaper than traditional ...

A diversified portfolio of solar, wind and diesel was considered optimal in helping Saint Lucia reach its goal of 35 per cent renewable energy penetration by 2020. Such collaboration between a utility company and government is unusual in the region, and another way in which Saint Lucia is spearheading change.

The 3MW solar farm meets about 5% of St. Lucia's electricity demand and will reduce the volume of fuel purchased by LUCELEC by about 300 thousand gallons per year. LUCELEC uses approximately 20 million gallons of fuel per year. The solar farm builds on the work LUCELEC has been doing with grid-tied roof top solar PV systems since 2009.
