

How does solar energy work in Singapore?

This is made possible using photovoltaic (PV) systems. Located near the equator, Singapore is one of the most solar-dense cities in the world. We enjoy relatively high solar irradiance of an average annual solar irradiance of 1,580 kWh/m²/year. Real-time information on solar energy generated can be seen under the Solar Irradiance Map.

Why is solar energy catching on in Singapore?

Solar energy is catching on fast in Singapore as people and businesses see how it can change the way we get our electricity. The benefits of solar panels extend beyond reducing carbon emissions; they also offer significant long-term cost savings on energy bills while enhancing energy independence.

What is solar PV & how can it help Singapore?

Currently implemented on Jurong Island and at Changi Business Park, these solar PV systems represent an innovative approach to leveraging unused spaces for renewable energy generation, contributing to Singapore's sustainable development goals.

How does Singapore encourage solar energy adoption?

To encourage the adoption of solar energy among homeowners and businesses in Singapore, the government offers various financial incentives. These include grants, rebates, and subsidies to offset the initial prices of installing solar panels.

What is EDP Renewables doing in Singapore?

As of today, EDP Renewables has undertaken a plethora of solar projects, such as a rooftop solar system project for Ng Teng Fong Hospital, being the first to propose a solar energy solution in the healthcare industry in Singapore.

Is Singapore a good place to use solar energy?

This makes Singapore an ideal location to tap on solar energy as a clean energy source to generate electricity. As part of our national solar efforts, Singapore targets to deploy: At least 2 GWp by 2030, equivalent to meeting the annual electricity needs of around 350,000 households.

Solar energy is the most promising renewable energy source in Singapore because we receive an average annual solar irradiance of 1,580 kWh/m²/year and about 50% more solar radiation than countries in temperate ...
