

Are residential solar systems a viable solution in Sri Lanka?

As energy costs continue to rise and concerns about environmental sustainability grow, many homeowners in Sri Lanka consider residential solar systems as a viable solution. A well-designed solar power system can significantly reduce electricity bills, contribute to environmental sustainability, and even provide a backup power source during outages.

Who makes the best solar panels in Sri Lanka?

Hayleys Solar partners with leading tier-1 solar panel manufacturers around the world to provide the best solar panels in Sri Lanka. All our solar system projects are fitted with durable and conversion-efficient solar panels to ensure that our customers receive long-lasting solar systems.

Who is my solar energy Sri Lanka?

Thanks for submitting! MySolar Energy is an all-in-one full service energy provider in Sri Lanka. Our in-house team takes care of every part of your project. My Solar Energy Sri Lanka.

How does a solar system work in Sri Lanka?

Solar Panels: These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

What is the average payback on solar power in Sri Lanka?

The average payback on solar power in Sri Lanka is 5 years. After this payback period, you are earning money on your roof. Best choice when your bill is high and you have limited roof space. Zero your bill if you generate electricity as much as you consume. The energy you consume - Energy generated through solar = what you pay.
