

But energy experts say with the longest coastline in mainland Africa and an average of 10 hours of sunshine per day, Somalia has great potential for onshore wind and solar power. Somalia's private power companies rely on imported diesel to meet demand, making Mogadishu power cost more than three times the price of the global average.

But the energy mix - the balance of sources of energy in the supply - is becoming increasingly important as countries try to shift away from fossil fuels towards low-carbon sources of energy (nuclear or renewables including hydropower, solar and wind).

He has participated in the financing of over \$30 million in solar PV projects, including the 3 MW Scituate Solar Array, the second largest landfill solar array in Massachusetts and the recipient of the 2014 Project of the Year Award from PV America. Scituate is the first municipality in Massachusetts to be powered 100% by renewable energy.

transport, infrastructure, and property and service sectors. The country is also rich in renewable energy resources, such as solar and wind energy; and there is a great opportunity in promoting investments in renewable energy, which is explicitly stated as a priority in the Federal Government of Somalia's National Development Plan (2017-2019 ...
