This is achieved through a joint initiative with UNICEF for piloting an innovative model for solar market activation in rural areas of Sudan, funded by the Netherlands Enterprise agency. The model leverages the smart nexus between humanitarian and development sectors in Sudan (represented by UNICEF and Practical Action respectively).

Community-shared solar PV systems support the democratization with the efficiency of centralized systems. The paper highlights the economic competitiveness of this model in Hungary.

This includes promoting solar as a potential investment for international and national investors and donor institutions, including via the global Climate Investment Platform (CIP), and - building on our experience in ...
