An inverter starting at 97 percent efficiency could be at 92.2 percent or lower depending on the brand by the time the energy finally makes it to its destination. So, yes, DC transformerless is a streamlined, future-proof architecture, but you will be making a compromise in efficiency somewhere.

FIMER turnkey solutions capitalize on our long expertise in the development and manufacturing of secondary substations and medium voltage (MV) components. FIMER solutions include complete plug-and-play housings with inverters and MV components, inverter stations for indoor inverters as well as separate MV stations to supplement the outdoor inverters and inverter stations.
