

What is Sunbeam Luna?

Sunbeam Luna is our mounting system for pitched roofs. The smart, stable construction allows for a rapid mounting process and optimally and safely supports the solar panels. This way, the solar panels can generate sustainable energy for years, without any issues.

How big is Taiwan's solar panel installation?

Solar panel installation in Taiwan is expected to plummet about 37 percent year-on-year to 1.7 gigawatts, compared with 2.7 gigawatts last year, Motech estimated. The company has begun to produce a new generation of TOPCon solar wafers called G10, which are larger than the previous generation M6 wafers, it said.

What percentage of solar PV installations are in Taiwan?

Solar PV capacity accounted for 13.0% of total power plant installations globally in 2022, according to GlobalData, with total recorded solar PV capacity of 1,109GW. This is expected to contribute 30% by the end of 2030 with capacity of installations aggregating up to 4,002GW. Of the total global solar PV capacity, 0.88% is in Taiwan.

What is the outlook for the Taiwanese solar market?

As the outlook for the Taiwanese solar market looks bleak, Motech has concentrated efforts on overseas markets, which contribute more revenue than the domestic market, he said. Solar panel installation in Taiwan is expected to plummet about 37 percent year-on-year to 1.7 gigawatts, compared with 2.7 gigawatts last year, Motech estimated.

Does Sunbeam have a ballasted roof system?

Until now, the Supra system has been installed ballasted. However, with the addition of fully anchored systems, Sunbeam now offers an innovative solution for roofs that can support less weight. This is a crucial development, as ballasted systems are sometimes not a viable option for certain roof structures.

How many solar panels are placed diagonally on Sunbeam Luna substructures?

In addition, almost 14,000 panels are placed diagonally on Sunbeam Luna substructures. The solar roof of Scania Production in Zwolle, featuring roughly 22,000 solar panels, has a capacity of 6 MWp. This project was realised by Zonneplan using a Sunbeam Symmetrical substructure.

The online Galileo calculation programme was developed to effortlessly draft layouts and determine the required components, ballast and price for any Sunbeam project. Galileo offers a wealth of functionalities, such as drawing panels on aerial photos and online support from Sunbeam Engineers. The programme also supports the newer generations of long(er) solar ...
