

What is biofermtm technology?

Committed to sustainable and economical organic waste diversion, the BIOFerm™ technology utilizes anaerobic digestion to harness biogas rising from fermenting organics--food waste, manure, biosolids, etc.--converting it into valuable green energy, heat, fuel, and more.

Can natural gas be used in BIOFerm?

Natural gas can only be used to best effect once it is freed of hydrogen sulfide, volatile organic compounds, and siloxanes. This is done by passing it through large adsorbers filled with BIOFerm's activated carbon.

How does a PFR tank function?

A PFR (Plug Flow Reactor) tank functions with a steel tank having a rectangular footprint and a horizontal paddle mixer that runs the full length of the tank. The mixer is powered by planetary drive units at both ends, and the tank is heated through the horizontal mixer shaft. Depending on the project, solid or liquid feeding systems are utilized. PFR is often combined with CSTR (Continuous Stirred Tank Reactor) tanks.

Why should you choose BIOFerm?

Choosing BIOFerm for anaerobic digestion offers you the convenience of a single point of contact and wrapped contracts, as opposed to dealing with multiple contractors and conflicting technologies. Our facilities have integrated programming and similar equipment, ensuring streamlined operations.

BIOFerm Energy Systems | 2.065 Follower:innen auf LinkedIn. Industry leading EPC company specializing in anaerobic digestion, gas processing, and solar PV systems. | BIOFerm Energy Systems is headquartered in Madison, Wisconsin and provides turnkey anaerobic digestion, gas upgrading and solar power systems across the US and Canada. BIOFerm partners with a ...

BIOFerm provides a complete suite of anaerobic digesters to the North American market for varying types and amounts of feedstock. ... Possible feedstocks include manure, biosolids, food waste, brewery waste, energy crops, and other low-solids organics. CSTR digester tanks are available in different sizes and can be combined, depending on tank ...

BIOFerm Energy Systems provides turnkey gas upgrading and anaerobic digestion facilities in North America, with our technology implemented at more than 450 digester installations and 900 PSA installations. Based in Madison, Wis., our company offers design, engineering, construction, operation and management of turnkey biogas projects. ...
