Trinidad and Tobago is a small island developing state (SIDS) with one of the largest emitters of CO<sub>2</sub> per capita globally - linked to a reliance on oil and gas. With the country's commitment to sustainable development goals and climate change agreements, rapid redesign of the national power sector is critical to promoting a sustainable energy transition.

Prices for natural gas vary from city to city and state to state, based on a variety of factors. According to the US Energy Information Administration, natural gas prices are a function of market supply and demand. Increases in natural gas supply generally result in lower natural gas prices and decreases in supply tend to lead to higher prices.
