

Is geothermal exploration possible in Uganda?

Geothermal exploration has reached advanced stages of surface exploration in Katwe, Buranga and Kibiro and a feasibility study is foreseen. The geology of Uganda consists of an exposed pre-Cambrian basement dissected by the western branch of the East African Rift system in the western part of the country (Fig. 2).

What is the geothermal energy potential of Uganda?

GEOHERMAL ENERGY POTENTIAL OF UGANDA ABSTRACT: Ugandais currently facing power shortages with demand exceeding supply by about 130 MW. This is mainly due to climatic fluctuations that have reduced hydropower output from 380 MW, the capacity of hydropower dams at Jinja, to less than 150 MW.

What are the geothermal manifestations in Uganda?

Geothermal manifestations in Uganda are mainly hot springs. In Katwe the hot springs are found in Lakes Katwe and Kitagata with temperatures between 30 and 70°C and 30-40 ppm H₂S. Buranga has the most impressive hot springs some of which are boiling, max. temp. 98°C, deposits of sulphur.

Why is Uganda facing power shortages?

ABSTRACT: Ugandais currently facing power shortages with demand exceeding supply by about 130 MW. This is mainly due to climatic fluctuations that have reduced hydropower output from 380 MW, the capacity of hydropower dams at Jinja, to less than 150 MW.

Proceedings World Geothermal Congress 2020+1 Reykjavik, Iceland, April - October 2021
1 Potential of Direct Use of Geothermal Energy in Uganda James Francis Natukunda and Godfrey Bahati Ministry of Energy and Mineral Development, Uganda, P. O. Box 9, Entebbe, Uganda jfnatukunda@gmail , gbahati@gmail

"The aim of geothermal energy is to develop energy to compliment hydro and other sources of power to meet the energy demand of Uganda in sound environment", so Mr Bahati With a current total installed power generation capacity of around 893 MW with about 724 MW of operating capacity.

"GEO ENERGY GROUP" LLP. Seismic exploration for oil and gas. A specialized marine flotilla, modern geophysical equipment, a base for supporting geophysical operations, and extensive experience allow us to carry out all types of seismic work, including linear and volumetric research, both on land and at sea, according to the highest ...

Geo Energy Group | 4,358 followers on LinkedIn. GEO ENERGY GROUP is a coal mining group, established since 2008, with offices in Singapore and Jakarta, Indonesia and production operations in Kalimantan, Indonesia. Geo Energy has been listed on Singapore Stock Exchange's main board (Bloomberg Ticker: GERL

SP) since 2012 and is part of the Singapore FTSE index.

Energy Ministry Partners with Aska Group to Develop Geothermal Power Production Uganda September 12, 2022 The Government of Uganda represented by the Ministry of Energy and Mineral Development (MEMD) has partnered with ASKA Infrastructure Development to de. . .

Harnessing geothermal energy resources will hugely help to achieve the targets and indicators of sustainable development goal (SDG 7) on clean energy for all in Africa with other SDGs too.
