

What does GTI energy do?

GTI Energy is focused on developing, scaling, and deploying energy transition solutions that improve lives, economies, and the environment. © 2024 GTI Energy. All Rights Reserved. GTI Energy is a leading technology development organization.

How has Russia impacted Ukraine's energy system?

Since October 2022, Ukraine's energy system has been one of the main targets of Russia's brutal military attacks. Russia has escalated its attacks since March 2024, causing significant damage to Ukraine's power generation capacity and further endangering the Ukrainian people's access to critical services.

Is the energy sector under a massive attack in Ukraine?

"The enemy continues its terror. Once again, the energy sector across Ukraine is under massive attack," Ukrainian energy minister German Halushchenko said on his official Facebook page. The extent of the damage had yet to be clarified, he said, while urging people to remain in shelters.

Is the Ukraine energy support fund restoring domestic generation capacity?

While the Ukraine Energy Support Fund is currently restoring and installing 2 GW of domestic generation capacity ahead of winter, a significant gap to cover the restoration needs still remains. We therefore encourage the international community to continue contributions.

How much money has URC24 contributed to Ukraine's energy sector?

The Group has so far been able to mobilize more than USD 5 billion in support of Ukraine's energy sector, including more than USD 1 billion committed since URC24 in June as a reaction to the intensified Russian attacks.

Why did the G7+ Ukraine energy coordination group meet at COP29?

We, the members of the G7+Ukraine Energy Coordination Group, met on the margins of the COP29 to reaffirm our unwavering support for Ukraine in the face of Russia's illegal, unprovoked and unjustified war of aggression against Ukraine and its brutal and unjust attacks on Ukraine and its energy infrastructure.

This open project is welcoming new partners from around the world. OEMs, engineering companies, and power plant owner/operators are invited to join to gain a better understanding of how sCO₂ technology can improve high-efficiency power generation.

GTI Energy has a U-GAS™ technology that enables large-scale production of renewable fuels, clean chemicals, and power from low-carbon feedstocks. In 2019, SunGas Renewables Inc. was established as a subsidiary of GTI International to take U-GAS technology to market for biomass and other waste feedstocks.

GTI Energy designed the Net Zero Infrastructure program (NZIP) to test and map the most practical opportunities for integrating low-carbon solutions within the existing natural gas infrastructure, including: Hydrogen. Renewable Natural ...

In April 2021, GTI Energy launched a brand refresh to reflect our growing capabilities, expertise, and impact across energy system transitions. The name was updated from Gas Technology Institute to GTI Energy to more accurately represent the expansive reach of our work built on a legacy of natural gas research.

4 ???· Moldova, Ukraine's small ex-Soviet western neighbour, has also been in talks to secure supplies from Gazprom and, with the expiry of the transit deal imminent, is considering ...

3 ???· The report finds that what are known as distributed energy resources can play a pivotal role in achieving Ukraine's 2030 energy goals. Though there are many uncertainties, it could ...

About GTI. GTI is a leading research, development, and training organization addressing global energy and environmental challenges to enable a secure, reliable, abundant, and clean energy future. For nearly 80 years as an independent not-for-profit, GTI has been developing technology-based solutions that benefit industry, government, and consumers.

GTI Energy is a technology development and training organization with a long-standing commitment to carbon management. With decades of collaboration experience with governments, academia, industry partners, and local communities, we develop reliable, efficient, affordable, low- and zero-carbon energy solutions that improve lives, economies, and the environment.

This Virtual Instructor-Led course will guide you through the technical and operational fundamentals of hydrogen as an energy carrier. It will also touch on key opportunities and challenges with hydrogen in the global decarbonization context.

GTI Energy and S& P Global Commodity Insights today announced a cohort of new stakeholders to their Open Hydrogen Initiative (OHI), a recently announced collaboration to further transparency into the ...

For CH₄ Connection 2017, GTI Energy partnered with Colorado State University (CSU)'s Energy Institute to organize CH₄ Connections 2017, which featured a tour of CSU's Methane Emissions Test and Evaluation Center (METEC) and drew a record number of attendees, sponsors, and exhibitors. A diverse group of keynote speakers and panelists focused ...

The 10-megawatt (MWe) Supercritical Transformational Electric Power (STEP) Demo pilot plant in San

Antonio, Texas, has successfully completed phase 1 testing, demonstrating operability, efficiency, and commercial readiness of the supercritical carbon dioxide (sCO₂) power cycle in a simple recuperating configuration. The pilot plant achieved full operational speed of 27,000 ...

The 3rd annual "Women+ in Hydrogen" event to celebrate Women's History Month was held Tuesday, March 28th in Washington, DC. Speakers included EPRI's Vice President of Energy Supply and Low-Carbon Resources Neva Espinoza, Elizabeth Kocs, Program Manager at GTI Energy's Hydrogen Technology Center, and Sunita Satyapal, Director of the U.S. DOE's ...

GTI Director & CEO Bruce Lane commented, "We are excited that UEC has acquired these assets from Rio with a plan to build their third "hub-and-spoke" ISR production centre at the Sweetwater mill site. We remain convinced that uranium resources in the Great Divide Basin and Green Mountain district have real potential to be developed in a similar fashion to those in ...

GTI Energy is deeply involved in hydrogen research and development, with close collaborations already established in industry, research, and academia. GTI Energy has been conducting hydrogen technology research since the mid-1960s. HyRes will leverage GTI Energy's time-tested expertise in emissions research, reduction, and impact abatement.
