What are agsol solar-powered mills?

The Agsol Solar-Powered Mills are a collection of agro-processing machines designed to process a range of dried cereals and tubers. Their machines are available in both DC and AC formats. The mills have zero fuel cost, and are designed to serve from the household to community level. The product is designed, manufactured, and distributed by Agsol.

What is agsol agro-processing?

From idea, to product design, manufacture and commercial sales, Agsol is driven to deliver unique and life-changing solar powered agro-processing machines. Expertly designed and engineered for off-grid environments in emerging markets, they are a commercial solution for the world's poorest farmers and a catalyst for universal energy access.

What is agsol micromill?

At the heart of Agsol engineering is an understanding and commitment to the needs of off-grid farming communities. Agsol's MicroMill is a modern, clean, adaptable and aspirational alternative to diesel mills, AC electric mills or manual processing.

Agsol | 2,860 followers on LinkedIn. A key concern for Wallis and Futuna is an aging population with consequent economic development issues. Very few people aged 18-30 live on the islands due to the limited formal employment opportunities. Improving job creation is a current priority for the territorial government. Industries copra, handicrafts, fishing, lumber

In 1991, BNP Nouvelle-Calédonie, a subsidiary of BNP Paribas, established a subsidiary, Banque de Wallis-et-Futuna, in the territory. Two years earlier Banque Indosuez had closed its branch at Mata-Utu, leaving the territory without any bank. Following this, the Bank of Wallis-and-Futuna (BWF) with its head office in Wallis was created in 1991.

Agsol designs and manufactures precision-engineered solar-powered mills for off-grid farming communities, using the latest type of DC motors and incorporating the Internet of Things technology and powerful cloud
