

# Yemen best inverter with battery for home price

What type of battery is used in a home inverter?

Flat Plate battery: Flat plates are one of the most common types of batteries used in home inverters. These are also some of the cheapest ones. The Lead plate uses in these batteries are Flat in construction but the dimension of them is almost identical to short tubular batteries.

What are the different types of Inverter Batteries?

Batteries are available in different capacities and can be produced by different technologies. A 150Ah,100Ah and 200Ah rated inverter batteries are the most common size of battery available in the market. They are available in tall-tubular,tubular [also known as short tubular],Flat plate and Gel.

Should you use a normal inverter to charge a tall-tubular battery?

Using a normal inverter to charge a tall-tubular battery will increase the charging time of your battery. And you won't get a fully charged battery before the next power cut. Due to high battery life,these batteries also have the highest warranty period as compared to any other type of battery.

Why is it important to charge gel batteries with a normal inverter?

And the reason why it is important is that gel batteries required a little high voltage to charge as compared to other lead-acid batteries. Charging Gel batteries with normal inverters will end you up with semi charged battery. And you won't able to use the full capacity of the battery.

Which type of battery is best?

And with such a type of charge cycle, Tall-Tubular batteries are the most economical option available for you. They have the highest battery life which is 5-8 years and is suitable for regular power cuts, long backups and heavy loads (like AC).
